ADOPTED

## SOME OF THE MANY RESCUES

**Misfit**

Misfit was rescued from Makola. She was in terrible pain when we rescued her due to the head injury caused by an accident. The vets were unsure if she will pull through but she got better every day. Now she can stand on her own and she can run around. She will need to spend a few more weeks with us at the hospital.

**Kiri**

Kiri was rescued earlier this month with a dislocated hind leg joint and a wound caused by an accident. Kiri went through a surgery to correct the dislocation and he is now recovering. He will have to be with us for a while longer until his wounds are completely healed.

**Kadie**

We found Kadie with a fracture on her mouth and wounds on the legs. She underwent a surgery to correct the fractures on the jaw. Her wounds have now healed and she is doing much better. She can now eat slowly and we hope to find her a good home once she gets better.

## RESCUED AND NOW LOVED IN THEIR FOREVER HOMES

## CNVR held in Moratuwa

Team Embark concluded a successful vaccination and sterilization clinic at the Lunawa Hospital, Moratuwa last month. A total of 58 treatments and surgeries were conducted during this programme.

## Awareness Programme

A puppy petting session was conducted at the Sri Lanka Exhibition and Convention Centre for "Behind the Mask" organized in aid of a Mental Health Awareness Program.
