KALU was rescued

Kalu is one of the nicest dogs who just waits by the door for someone to pass by so that he could just wag his tail and show some love. Sadly, someone has poured hot water on him and he got burns on his legs and the eye area. He is now recovering from his burn wounds at the hospital.

KAITO Before

KAITO After

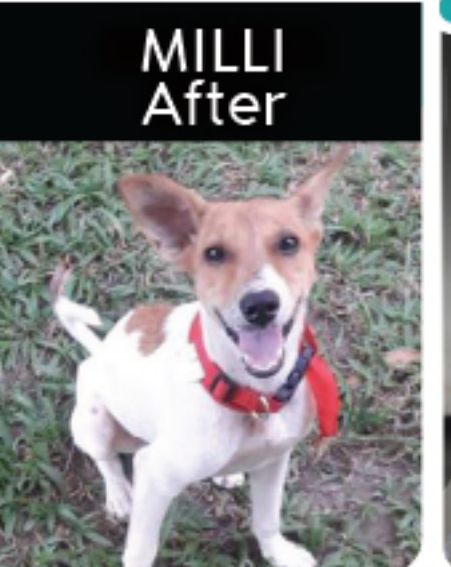

Before & After – KAITO

Kaito was rescued with a laceration on the left leg. He was receiving treatment at the hospital. He has not recovered and he will be looking for his forever home at the next adoption day.

ALAN Before

ALAN After

MILLI'S new home

When we found Milli she was suffering from a terrible skin condition. She had to go through a few months of treatment at our hospital. Soon she turned in to a beautiful girl! Milli found her forever home at our Jaela adoption day. She has her own family, home and she even has a nice big garden to play in.

ALAN finds happiness

Alan is the Doberman who was found dumped by a breeder in a terrible condition. He had a severe skin condition with wounds all over his body and he was terribly anemic. Alan recovered and finally found the happiness he deserves with a family who loves him. We wish you a wonderful life Alan. Your days of misery and suffering are finally behind you.

Saving Little PETE

Little Pete was rescued from Panagoda with a fracture on his leg. Sadly, his leg has to be amputated after his blood condition improves. Pete is a bundle of joy and looks forward to recovering and finding a good home soon.

Peliyagoda Fish Market & Godakawela CNVR Program

Embark successfully conducted two sterilization and treatment programmes in the Peliyagoda fish market and Godakawela areas. 323 vaccinations, 99 sterilizations and 88 treatments were completed. Sterilization is the only humane way to reduce the population of street dogs.

Volunteer programme for Ladies College students

21 passionate students from Ladies College, Colombo volunteered at Embark for three weeks this month. They learnt about the work we do, about animal welfare and visited the hospital. It was a great opportunity for the students to learn about showing compassion & empathy towards animals and the doggies got lots of cuddles!

Adoptions in August

Embark hosted 4 adoption days in August and 132 beautiful Sri Lankan street dogs found their home and families.

OUR IMPACT AUGUST

	VACCINATED	659
	SURGERIES	157
	TREATED	472
	ADOPTED	132
